

SNAPPY TITLE WITH A PUN:  
BORING BIT TO ACTUALLY DESCRIBE  
WHAT'S IN THE THESIS

Author's name

Author's College

University of Oxford

Trinity 2015

Supervised by Prof Super Visor

A thesis submitted for the degree of

*Doctor of Philosophy*

## Acknowledgements

I'd like to thank everyone, especially you. You're great.

# Abstract

Interesting science was done, and the results were remarkable. For the full story, you should read the rest of the thesis.

---

# Contents

---

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	An amazing revelation . . . . .	2
1.1.1	More details . . . . .	2

	<b>References</b>	<b>4</b>
	<b>Appendices</b>	<b>7</b>
<b>A</b>	<b>Example appendix</b>	<b>9</b>

---

## List of Figures

---

## Chapter 1

---

# Introduction

---

Munk (1950) says interesting things about the ocean.

## 1.1 An amazing revelation

It's so interesting, that we need to display a separate page.

### 1.1.1 More details

Some things deserve their own subsection - this is one of those things. More details can be found in Appendix A.

#### 1.1.1.1 Nesting sections is fun

Will this one get listed in the table of contents? It's up to you!

Equations, like this one,

$$a^2 + b^2 = c^2 \tag{1.1}$$

are numbered only to the chapter level by default.

---

# Methods

---

How?

---

## References

---

Munk, W. H. 1950 On the wind-driven ocean circulation. *Journal of Meteorology*, **7**(2), 79–93.

# Appendices

### Example appendix

---

Some less interesting things need to be put in appendices. Everything here is less exciting than chapter 1.

It's sad but true.
